

ENVIRONMENTAL POLICY

Objectives

The aim of MSI is to protect the environment in which we operate. We shall take all reasonably practicable actions to maintain the nature of these surroundings. MSI furthermore adheres to all local, international laws and regulations and best business practice guidelines.

Responsibility

The directors have overall responsibility and authority for ensuring that the environmental conventions and regulations are complied with. Employees and contractors shall observe all decisions taken at these meetings.

Management and Control

This policy is implemented through regular weekly environmental discussions and project de-/ briefing meetings. The de-/briefing meetings plan and control how work is performed, with an emphasis on local environmental concerns, potential environmentally and culturally sensitive areas and how to operate in them. The weekly meetings address ISO14001 issues, performance target issues and look at resources and training required to deal adequately with the disposal of waste.
